

DGC AFRICA capability includes the installation of **WELD-IN INSERTS** as a cost-effective option to allow fastening of liners in position. Although typically installed in weld overlay plate, **WELD-IN INSERTS** may also be an option for Q&T plate. Insert shape is only limited to whether the internal shape can be machined from "mild steel" bar.

Although typically installed in weld overlay plate, **weld-in inserts** may also be an option for Q&T plate. Insert shape is only limited to whether the internal shape can be machined from "mild steel" bar.
