

**ENDURACAST**® products include bi-metallic products, such as: wear buttons, wear blocks, wear bars & wear plates  
**ENDURACAST**® products are used to prolong wear life on fixed and mobile plant equipment subject to high abrasion.

### WEAR BILLETS

Offer excellent wear protection and extensively used in hotspot areas found on heavy equipment such as buckets, loaders, excavators, draglines.

### WEAR LINERS

Easy to use with no excessive cutting when compared to sheets or plates.

### SKIRT LINERS

Can be formed and welded onto flat or curved surfaces. This allows them to be used on a range of fixed plant and mobile equipment such as buckets and chute liners.

**MADE TO ORDER (MTO)** - All our **ENDURACAST** products can be modified, pre-engineered to match any design, or application.

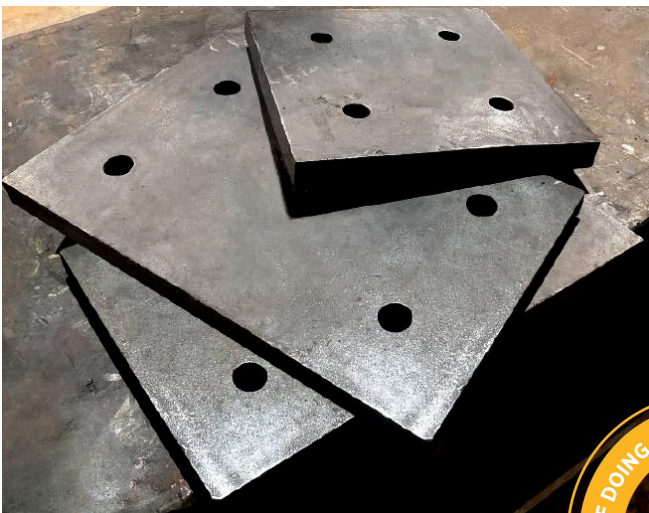

### BENEFITS

- Common sizes readily available
- Proven wear properties of casting
- Made to order product available

### APPLICATIONS

Applications involving varying degrees of sliding abrasion and impact, such as:

- Chutes
- Ore Bins
- Feeders
- Stackers
- Hoppers

Technical Data Sheet available upon request.
